

ENTERPRISE RISK ASSESSMENTS

- **AUDITOR APPROVED**

Consultants are very helpful when you need a certain type of expertise to help you for a limited amount of time. They are valuable when they produce work products that are based on industry standards, and not consultant assumptions.

- **CONSISTENT, TOOLS-BASED APPROACH**

Evanesco's Risk Assessments provide you and your organization with what you need to comply with industry regulations. Produced with a tool, based on the Carnegie Mellon Software Engineering Institute's OCTAVE® Allegro methodology,

- **SECURITY COMPLIANCE EXPERIENCED**

Assessments are performed by persons with significant experience with cybersecurity compliance industry standards.

- **FAST & AFFORDABLE**

Risk Assessments can be completed in five days. Contact Evanesco at sales@evanESCO.cloud.

PROFESSIONAL SERVICES THAT HELP YOU MEASURE AND MANAGE ENTERPRISE RISK.

The Challenge

Changes within an organization provide challenges when attempting to determine the degree of exposure to information asset risks. New system acquisitions, updated procedures for handling confidential information regarding clients, and the ever-increasing number of attack vectors all lead to confusion about how to select and capture the information needed to identify threats and implement effective plans for addressing them. It is understandable that regulatory bodies require organizations

conduct risk assessments as a part of their overall information security program on a regular basis.

The Solution

Enterprise Risk Assessments, based on an industry accepted methodology, provide a holistic, organization-wide view of critical information assets and their associated threat profiles. Organizations can utilize this view to craft and implement a solid "roadmap" for addressing key issues in a timely manner.
